

22 Sept 2008 Victoria, Australia

Hi All

I have just recently supplied some of the Protect-It Maxi post protection kits to one of my customers and have taken some pictures (attached) to show what the end result looks like. Once I worked out the required formation to fit the post, these were very easy to install taking only a few minutes to install each kit.

The customer is very happy with the end product and is going to purchase more of these for his other sites interstate.

If anyone has a potential sale for this type of product I will be happy to help out or you can contact Paul Huxtable at Eye Catcher innovations and he would be happy to help out.

Thanks Paul for all your help.
