

Technical Bulletin 002 – Dexion Mk6 Baseplate Option

The following information relates to fitting Protect-it onto a Dexion Mk6 90mm upright with a heavy duty baseplate.

We recommend the use of our Protect-it 100A product for Dexion Mk6 90mm uprights. However, when the upright is installed with a heavy duty baseplate, you should use a Protect-it 100C to cover the baseplate, followed by Protect-it 100A products on the remainder of the upright.

This photo shows how the Protect-it 100C fits over the baseplate.

This photo shows how a Protect-it 100A (shown in black) will then fit above the Protect-it 100C (shown in yellow).

Note: From time to time you may identify other unusual fitting problems that may require a unique solution. We have a Protect-it™ product or combination of products to suit most applications. Please contact us to discuss your needs.
